Theme of Session:

The focal objective of the special session on “**Human Values, Intelligent Systems & IT for Engineering & Management (HWISEM)**” is to discuss about the technological and scientific development in Human Values, Intelligent Systems, IT, Engineering & Management through the ages. This session aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results about all aspects of Human Values, Professional Ethics, Engineering and Management. It also aims to provide a forum for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of Human Values, Engineering and Management. This will provide a forum for the interaction and integration in these related disciplines.

Topics of Interest:

Full length original and unpublished research papers based on theoretical or experimental contributions related to the below mentioned tracks are invited for submission in this special session:
